

Construction project management – we'll be happy to advise you

Our architectural firm consists of experienced project managers who plan and coordinate your construction projects while also dealing with general building maintenance. Our fit-out workshop implements repairs and takes all necessary emergency measures as well as smaller carpentry jobs.

Benefits

- We know the localities, special circumstances and structures of Zurich Airport which specifically enables us to implement projects efficiently without lengthy preparations
- Conditions at the airport are unique in regard to access, construction processes, building services and idle operational times. Working with our specialists from the beginning stages till completion, ensures efficiency which saves you time and money.
- At Zurich Airport we also have unlimited access to planners and businesses which are ready assist you immediately when needed (engineers, specialist engineers, painters, builders etc.)
- Competitive prices, cost transparency
- Small number of contact persons, direct contact with the authorities
- Always on site. When your project is complete, we can easily be called upon to work under warranty regarding repairs at any time. Even minor issues can be quickly resolved.

QUALITY STANDARDS

- We are construction specialists who work extremely well in an airport setting
- We set high standards by giving our employees extensive internal training while also offering them external courses and workshop events (specializing in various topics e.g. construction suitable for people with disabilities)

QUALITY CONTROL

- We work in accordance with the SIA standards (Swiss Society of Engineers and Architects)
- We adhere to specific airport security regulations

Services

- Project development, planning and implementation of your construction projects (newbuilds, conversions, refurbishments)
- Representing clients in newbuilds and conversions
- Upon request, partial services can be handled for you, such as construction management
- Fit-out workshop for building repairs and smaller new items of equipment and installations
- For larger projects, expert external partners can be arranged
- Coordination of route and destination signs
